Cosmetic Dentistry

Modern Dentistry is about more than just drilling & filling!

Our initial aims are to ensure that your mouth is dentally fit & healthy. You may then like to consider cosmetic treatment, using the very latest techniques and materials our highly skilled dentists can give you a smile to be proud of.

Are you happy with your smile?
If you answer yes to any of the following questions, cosmetic dentistry may be the answer for you.

- Do you cover your mouth with your hand when talking or laughing?
- When having your picture taken, do you smile with your lips closed?
- Are you unhappy with the appearance of your teeth and smile?
- Would you like to have whiter teeth?
- Do you have any missing teeth or spaces between your teeth?
- Do you have teeth that are crooked or uneven?

At Pennypot Dental you can be confident of an excellent standard of treatment. Below is a brief summary of the services and treatments that are available to you:

Tooth Whitening by a dental professional is the safest and most effective way to enhance the colour of your teeth.

Smile Design covers imperfections to improve the shape & position of your teeth for a 'perfect smile'.

Invisible Braces are removable and will straighten your teeth without any unsightly wires or brackets.

Implants are an ideal alternative to bridges or dentures; they provide a fixed and long lasting replacement for missing teeth.

Wrinkle Correction Treatments smooth lines and wrinkles for a more youthful appearance.

If you wish to discuss any of these treatments please

Tooth Whitening

Having your teeth whitened will give your smile a renewed sparkle and improve your self-confidence.

Our most popular whitening is
Zoom! Instant Power Whitening
£24.50 per month with our
0% finance or **£588.00**

Your teeth will be whitened in
surgery, a lamp is used to speed up
the whitening process.
You will get the same result in One Hour
as you would two weeks of the home
whitening!

Professional tray whitening **£384.00**

You will have impressions taken to form custom made whitening trays. You will be given these with a Nite-white gel kit. You will need to use these overnight for approximately 2 weeks per arch (upper and lower).

Enlighten advanced power whitening **£971.00**

This is the top of the range whitening option & guarantees to whiten your teeth by 8 shades. Custom made 'Enlighten' whitening trays will be prepared. You must use upper and lower trays together for 14 consecutive nights; on the 15th day of treatment you attend the practice for the in-surgery treatment.

Remember 0% is available on treatments over £500

Please ask for a free consultation with our Treatment Coordinator to discuss whitening & finance

Smile Design

Congratulations

Dr Manoj- Specialist Prosthodontics

As many of you may be aware, Dr Manoj has been continuing his education and studying in London. At the completion of a four year training program Manoj has been awarded a Masters in Clinical Dentistry in Prosthodontics from Guys, Kings & St Thomas' University of London and Membership in Restorative Dentistry for the Royal College of Surgeons of Edinburgh.

Dr Manoj Patel
Specialist
BDS (Guys) MFDS(Glas) MClindent (prosthodontics) MRD

The Kentish Express came to interview Dr Manoj in January 3rd 2008

“Every year only four Dentists qualify as Specialists in this field and typically they go to work in London, so it is pretty rare to get this service somewhere like Hythe”.

Chris Denham

Dr Manoj's Continuing Education

Manoj qualified in Dentistry from Guys University London in 1998. After graduating he continued working at Guys and in 2003 was awarded Membership in the faculty of Dental Surgery at the Royal College of Physicians & Surgeons of Glasgow. Manoj then went on to complete Specialist training in Prosthodontics at Guys while continuing to treat his patients at Pennypot.

Manoj's training gives his patients a high level of care and expertise, technical excellence with a warm and caring manner means that Manoj is well liked and respected by his colleagues and patients alike.

Dr Manoj is a Restorative Specialist, he improves the appearance of his patient's teeth to give a more confident smile that involves:

Advanced cosmetic and restorative procedures

using:

- Veneers
- Crowns
- Bridges
- Implants

If you have any dental concerns that you would like to discuss with Dr Manoj, he is able to offer a free consultation for treatment advice.

Multiple tooth replacement

Full dentures can be anchored with implants
Enabling patients to chew more effectively,
improve the enjoyment and taste of food.

Invisible Braces

Straighten teeth without unsightly metal

If you would like to have straighter teeth, 'Clear Aligner' may be the answer for you. At Pennypot we can now help you obtain the straight teeth you've always wanted - without unsightly brackets and wires.

Q. How long does this treatment take?

A. The duration will depend upon each individual case but the average is about 12 months.

Q. How often will I have to wear my aligners?

A. The aligners should be worn day and night but can be removed to eat and to brush and floss your teeth.

It is now possible to straighten teeth using clear, custom-made, virtually undetectable aligners.

Once we have decided that this is the right treatment for you we will write a treatment plan. Using the latest 3-D computer technology we produce a series of precisely customised aligners. You then wear each set for around two weeks and they gradually move your teeth - millimetre by millimetre - until the desired result = straighter teeth!

Inman Aligner

Straighter teeth in just a few weeks!

As well as invisible braces we now offer the latest advancement in orthodontic care, the Inman Aligner. Because it works so quickly and efficiently, if you don't like the idea of having brackets stuck to your teeth or waiting months for a clear brace to work, you can now have your front teeth straightened in as little as 6 -14 weeks at an affordable price. The Inman Aligner utilises space age materials to generate comfortable, continuous orthodontic force. It can efficiently straighten out your front teeth.

Q. How does the Inman Aligner work?

A. The Inman Aligner applies a gentle pressure to the teeth that need to be moved to an ideal position. This gentle process is provided by the spring action of the appliance. Once your teeth are corrected the Inman aligner works like a retainer and holds them in place.

Q. Can the Inman Aligner correct all crowded teeth?

A. No. The Inman Aligner is designed to treat the upper and lower front teeth. After an evaluation, your dentist can determine if the Inman Aligner is right for your particular case, and will recommend treatment options.

Wrinkle Correction Treatments

Would you like younger looking skin?

A few too many laughter lines?

Everyone knows that regular exercise and a balanced diet are essential to stay healthy, feel well and look good. But nothing can stop time passing and whether we like it or not, we all grow older and it shows in our faces. Frown lines and wrinkles are a normal part of the ageing process but they can make you look tired, angry or older than you really are.

The structure of skin changes with time and it becomes less elastic and flexible. There are fewer fat cells in the lower layers and the skin becomes more transparent whilst the oil and sweat glands which help keep skin supple become less active. Muscles in the face begin to sag and the skin becomes creased and folded.

Ageing is a natural process and many people want to feel good for their age with a natural look.

There are a few simple rules to follow to encourage healthy skin

- Use sunscreens every day when you are out in the sun
- Avoid Smoking, it is linked to premature skin aging and wrinkles
- Eat a healthy diet including fresh fruit and vegetables
- Drink plenty of water
- Apply moisturisers to help keep skin smooth.

Wrinkle correction treatments are fast, safe and long lasting. At Pennypot we can use 'Botox' which will smooth forehead wrinkles, or 'frown lines', and wrinkles around the eyes, such as crows' feet or laughter lines.

One area that is particularly prone to creasing as we get older is around the nose to mouth and particularly 'marionette lines' below the angle of the mouth. We can treat these areas using dermal fillers, which soften the creasing and make you look instantly rejuvenated.

We can also use dermal fillers to enhance the shape and possibly the fullness of your lips, which is one of the most effective ways of making you feel confident about your smile.

Valplast Dentures

It's what you can't see that makes the difference!

Nobody has to know that you're missing teeth! For more than five decades Valplast flexible dentures have been the preferred choice of patients looking for a method of tooth replacement that is aesthetic, comfortable and affordable. Valplast dentures cost less than dental implants and dental bridges and they require no surgery or invasive procedures. Compared to traditional metal partial dentures, Valplast offers better aesthetics, comfort and durability. In fact, Valplast dentures are made from an unbreakable nylon resin and each Valplast restoration comes with a lifetime guarantee against breakage and fracture.

It was long thought that removable partial dentures had to be rigid to be effective. The innovation of the Valplast Flexible Denture allows the restoration to adapt to the constant movement and flexibility in your mouth. This is the underlying thinking behind Valplast's innovative flexible, removable partial denture. The flexibility, combined with strength and light weight, provides total comfort and great looks!

If you would like to find out more, why not arrange a consultation with us at the practice and ask us about what makes this flexible denture different.

To,
All Staff at Pennypot Dental

"I just wanted to say thank you for being so kind and patient with me on Thursday 20th May, whilst I had my wisdom tooth removed. All staff including the oral surgeon, his assistant and the receptionist showed a lot of care and kindness trying to put me at ease. I will certainly recommend you to anyone needing dental work. Thank you once again

Professional and thorough attention by clinical and administrative staff. Everyone knows your name, adding a more personal touch.

My well being was a consideration from start to finish. Rashmi has executed her work on my specific dental requirements with great care, professionalism and attention to every detail - a very impressive and well organized dental practice.

The whole team made what could have been a nervous experience into a pleasure - almost 😊

Thank you all at Pennypot. an outfit to be recommended most certainly

What Patients Say...

Take a look at our patient testimonials

"I have always been unhappy with the appearance of my teeth and would put my hand in front of my mouth when I smiled. I hated having my photo taken. When my daughter informed me of her forthcoming wedding, I made the first move and booked the consultation appointment.

I was greeted by an enthusiastic team and everyone went out of their way to put me at ease. The results of the smile makeover were amazing. The confidence behind my smile at my daughter's wedding was down due to the team at Pennypot. Thanks you so much!"

Initially I was very nervous, everyone put me at ease made me feel less afraid. Everyone was so supportive and positive during appointments. The treatment I have undergone has been well worthwhile. I have gained confidence. I smile without putting my hand across my mouth. I recommend this smile transformation to everyone. It's BRILLIANT.

Smile design has given me much confidence which has made me feel and look much younger than before. My new teeth look very natural. Dr Rashmi Patel took great care and patience. Her expertise in dentistry was at the highest level. The staff at The Pennypot Dental Surgery were very helpful, can up and kind. I was very impressed with the latest dental technology used during my treatment to achieve this wonderful smile.

DEAR OMAR

You have bin very nice to me and you cleaned my teeth for me when that was very yellow.
